VULCAN News

20 Years and Going Strong!

Following two decades of successfully delivering custom software solutions, software services and professional services to clients across Ireland and abroad, Vulcan Solutions definitely have reason to celebrate its' 20th year in business this year. The company plans to celebrate this impressive milestone at a special event for staff and friends this summer. Details of this event will be announced later this quarter.

Since its establishment in 1989, Vulcan Solutions has carried out implementation and consultancy projects for a number of high profile clients across Ireland such as Bank of Ireland, AIB, Hibernian Insurance, One Direct, Roads Safety Authority (RSA), An Post, Friends First and HC Financial Services. The company has expanded its business and portfolio to meet the growing needs of its customers within the Financial Service, Government and other sectors. It has developed an impressive offering of software solutions (VULCAN Loan & Insurance Systems), licensed products (Microsoft Dynamics CRM), software services (Software Development, System Integration, System Implementation & Support) and consultancy services (from IT strategy formulation to business and change analysis).

Vulcan Solutions has been a Microsoft Gold Certified Partner for the past four years. This relationship, with the world's largest technology provider, has benefited the company's continued expansion and provided Vulcan Solutions with the expertise and competencies required to be a world-class ISV, technology and business consultancy provider. Vulcan Solutions staff and management have developed a wide range of specialities in relation to Microsoft technologies.

This year, Vulcan Solutions aims to further develop and deepen its' relationship with Microsoft, by attempting to qualify for a third Microsoft Solutions Competency (the company already has two certified competencies; ISV/ Software Solutions Competency & Database Solutions Competency), the Microsoft Business Solutions Competency. This competency will recognise the company's continued development and expertise in the area of Microsoft Dynamics CRM. Using this cost-effective, scalable solution as a platform for the rapid development of business applications, Vulcan Solutions has implemented custom solutions across a range of private and public organisations.

Another recent and exciting development at the company has been the introduction of a range of professional services aimed at creating sustainable competitive advantage and increased productivity among Ireland's public and private sector. 'Competitiveness Through Technology' is a consultancy program designed to help organisations identify IT investments that will enhance their competitiveness and increase their productivity. Through the provision of practical business and technical advice, our team of multi-disciplined advisors enable organisations to maximise the business value of their Information Technology.
